As at 30 September 2021, the immediate holding company of the Company was Red Link International Limited, a limited liability incorporated in the British Virgin Islands. The directors of the Company considered the ultimate holding company to be Red Link International Limited.

2. BASIS OF PRESENTATION AND PREPARATION

The unaudited condensed consolidated financial statements has been prepared in accordance with Hong Kong Financial Reporting Standards (“**HKFRSs**”), which collective term includes all individual HKFRSs, Hong Kong Accounting Standards (“**HKASs**”) and related interpretations, issued by the Hong Kong Institute of Certified Public Accountants (the “**HKICPA**”). The unaudited condensed consolidated financial statements also comply with the applicable disclosure requirements of the Hong Kong Companies Ordinance and the Rules Governing the Listing of Securities on GEM of the Stock Exchange. The unaudited condensed consolidated financial statements are presented in Singapore dollars (“**SGD**”). Items included in the unaudited financial statements of each entity within the Group are measured using the currency that best reflects the economic substance of the underlying events and circumstances relevant to that entity (the “**functional currency**”). The functional currency of the Company is SGD. The subsidiaries are operating in Singapore and the PRC. SGD is used as the presentation currency of the Group.

The unaudited condensed consolidated financial statements are prepared on the historical cost basis. It should be noted that accounting estimates and assumptions are used in preparation of the unaudited condensed consolidated financial statements. Although these estimates are based on management’s best knowledge and judgment of current events and actions, actual results may ultimately differ from those estimates and assumptions.

Basis of consolidation

The unaudited condensed consolidated financial statements comprise the financial statements of the Company and its subsidiaries. Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the unaudited condensed consolidated financial statements. Unrealised losses resulting from intragroup transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

A subsidiary is an investee over which the Company is able to exercise control. The Company controls an investee if all three of the following elements are present: power over the investee, exposure or rights to variable returns from the investee, and the ability to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control. Goodwill arising on acquisition is recognised as an asset at the acquisition date and initially measured at the excess of the sum of the consideration transferred, the amount of any noncontrolling interest in the acquiree and the fair value of the acquirer's previously held equity interest (if any) in the entity over net acquisition-date fair value amounts of the identifiable assets acquired and the liabilities and contingent liabilities assumed. If, after reassessment, the net fair value of the acquiree's identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held equity interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase.

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor a joint arrangement. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies. Associates are accounted for using the equity method whereby they are initially recognised at cost and thereafter, their carrying amount are adjusted for the Group's share of the postacquisition change in the associates' net assets except that losses in excess of the Group's interest in the associate are not recognised unless there is an obligation to make good those losses.

Profits and losses arising on transactions between the Group and its associates are recognised only to the extent of unrelated investors' interests in the associate. The investor's share in the associate's profits and losses resulting from these transactions is eliminated against the carrying value of the associate. Where unrealised losses provide evidence of impairment of the asset transferred they are recognised immediately in profit or loss. Any premium paid for an associate above the fair value of the Group's share of the identifiable assets, liabilities and contingent liabilities acquired is capitalised and included in the carrying amount of the associate. Where there is objective evidence that the investment in an associate has been impaired, the carrying amount of the investment is tested for impairment in the same way as other non-financial assets.

The Group is a party to a joint arrangement where there is a contractual arrangement that confers joint control over the relevant activities of the arrangement to the Group and at least one other party. Joint control is assessed under the same principles as control over subsidiaries.

The Group classifies its interests in joint arrangements as either:

- Joint ventures: where the Group has rights to only the net assets of the joint arrangement; or
- Joint operations: where the Group has both the rights to assets and obligations for the liabilities of the joint agreement.

In assessing the classification of interests in joint arrangements, the Group considers:

- the structure of the joint arrangement;
- the legal form of joint arrangements structured through a separate vehicle;
- the contractual terms of the joint arrangement agreement; and
- any other facts and circumstances (including any other contractual arrangements).

The Group accounts for its interests in joint ventures in the same manner as investments in associates (i.e. using the equity method).

The Group accounts for its interests joint operations by recognising its share of assets, liabilities, revenues and expenses in accordance with its contractually conferred rights and obligations.

The Group is principally engaged in the provision of a comprehensive range of after-market automotive services, with a focus on inspection, maintenance and repair services and also engaged in (i) offering short-term and long-term car rental services; and (ii) supplying passenger car spare parts, accessories and automotive equipment to customers in Singapore and overseas countries and automobiles to customers in China. The Group operates three service centres and one paint workshop in Singapore. Our service centres are equipped with cutting-edge diagnostic equipment and facilities for the provision of comprehensive after-market automotive services except for spray painting services which shall be handled by our paint workshop.

In order to broaden the trading of the Group's parallel imported vehicles and related businesses in Mainland China, the Group has established a wholly-owned subsidiary Hunan Optima Automobile Co., Ltd. in Changsha, Hunan, the PRC on 3 February 2021, which is mainly responsible for the business in central and southern China, with Hu Wu'an, the executive director of the Group, acting as the general manager. It mainly builds a supply chain focusing on imported vehicles, car spare parts and supporting services and provides customers with a "one-stop" high-quality services of parallel imported vehicles, safe, fast, price-competitive and flexible vehicle supporting financial insurance.

On 1 February 2021, there were news of the political developments in Myanmar, announcing the detention of Aung San Suu Kyi, the State Counsellor of Myanmar and the other leaders of the National League Democracy Party. Myanmar's military has also announced a one-year state of emergency during which the military would be taking over the affairs of Myanmar. It has further pledged to hold elections after one year and operate in line with existing laws. The operation of Optima Werkz Myanmar Services Co., Ltd. ("OWMS"), a 35% owned associate of the Group which is in the business of repairs and maintenance of motor vehicles including installation of parts and accessories in Yangon, Myanmar, was disrupted due to the current political situation and recent declaration of martial law in some areas of Yangon on 14 March 2021. To ensure the safety of all staff, they are advised to work from home until the situation improves. As at the date of this report, some of the staff has returned to work at the workshop.

Automotive supply income increased by approximately SGD22.0 million for the nine months ended 30 September 2021 (“**PE2021**”) as compared to the nine months ended 30 September 2020 (“**PE2020**”). The increase is mainly due to the Group commencing its activity to supply automobile spare parts, accessories, equipment and automobiles to customers in Mainland China in July 2020.

OUTLOOK

Although there has been progress in COVID-19 vaccines development and deployment around the world, uncertainties and risks in the global economy remains in the year ahead due to factors such as the adequacy of vaccine supplies and speed of vaccine deployment, the possible emergence and spread of new strains of the virus as well as the strength of policy support to drive economic recovery. The Group will adopt a cautious and prudent approach on expansions and will continue to focus on strengthening its position in the after-market automotive services business and the short-term and long-term rental business in Singapore and increasing its market share in the sales of automobiles, parts and related products in the Mainland China market.

The Group will continue to monitor the political development in Myanmar and the impact on the operations of its 35% owned associate, OWMS. Further information is required in order to ascertain the financial impact to the Group. The Group will provide further updates when there are material developments.

On 29 April 2021, Shenzhen Bainian Health Biotechnology Co. FINANCIAL REVIEW

Revenue

Revenue for the Group was approximately SGD34.4 million for PE2021 as compared approximately to SGD10.9 million for PE2020, an increase of approximately SGD23.5 million. The increase was mainly attributable to (i) an increase in sales of passenger car spare parts, accessories, automotive equipment and automobiles of approximately SGD21.8 million and SGD0.2 million attributable mainly to related business in Mainland China and Singapore respectively; (ii) an increase in aftermarket automotive service income of approximately SGD1.0 million; (iii) an increase in car rental income of approximately SGD0.5 million.

Cost of materials used

In PE2021, the cost of materials used increased by approximately SGD22.3 million as compared to PE2020. This was mainly attributable to (i) increase in sales of automobile spare parts, accessories, equipment, and automobiles to customers related to business in Mainland China which amounted to approximately SGD21.7 million; (ii) increase in materials used in relation to aftermarket automotive service and sales of passenger car spare parts, accessories for Singapore amounted to approximately SGD0.6 million. The increase of cost of materials used in providing after-market automobile services was brought about by the increase in related sales and the slight increase in average purchase prices from our vendors.

Marketing and advertising expenses

The increase in marketing and advertising expenses from approximately SGD0.1 million in PE2020 to SGD0.3 million in PE2021 was due to the increase in commission and referral fees paid to third parties and advertising expenses for the after-market automotive services and the sales of accessories.

Employee benefit expenses

In PE2021, the employee benefit expenses increased by approximately SGD0.8 million as compared to PE2020. This is due to a salary cut as part of the Group's cost control measures to mitigate the adverse impact from COVID-19 outbreak in PE2020. The salary cut was reverted in Q3 of PE2020. In addition, there was an interim bonus of approximately SGD0.1 million and an overall increase in staff headcount.

Impairment of trade receivables

In PE2021, the impairment of trade receivables decreased by approximately SGD0.8 million as compared to PE2020. This is due to an impairment of trade receivables recorded in PE2020 of approximately SGD0.8 million on trade receivables from customers affected by the economic effects brought on by COVID-19 and a long-term car rental customer.

Impairment of right-of-use assets

In PE2020, the Group has recorded an impairment of right-of-use assets amounting to approximately SGD0.2 million as a result of the effects of COVID-19 on the Singapore economy. No additional impairment of right-of-use assets is recorded in PE2021 as the Group is confident that Singapore economy is on a recovery track.

Other expenses

The increase in other expenses of approximately SGD0.4 million is mainly due to (i) an exchange gain of SGD0.2 million recorded in PE2020 as compared to an exchange loss of SGD13,000 recorded in PE2021, (ii) an increase in the maintenance cost of car rental and machinery of approximately SGD0.1 million, and (iii) an increase in professional fees of SGD0.1 million.

Income tax (expense)/credit

The Group recorded a tax expense of approximately SGD0.2 million in PE2021 as compared to a tax credit of approximately SGD4,000 in PE2020. This is mainly a result of the current period tax provision for income tax of a subsidiary in Singapore.

Loss and total comprehensive loss for the period

The Group recorded a loss and total comprehensive loss for PE2021 of approximately SGD0.1 million and SGD0.3 million respectively as compared to a loss and total comprehensive loss for PE2020 of approximately SGD0.8 million. The reduction in loss and total comprehensive loss for PE2021 is mainly due to combined effects of the decrease in impairment of trade receivables and right of use and increase in revenue offset by increase in cost of materials used.
